

ENHANCE

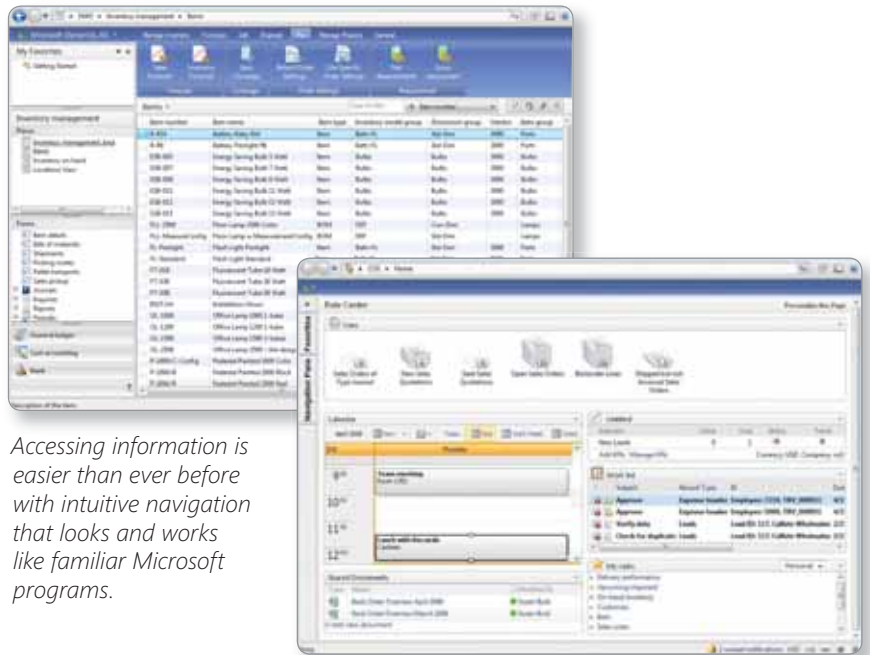

What's New in Microsoft Dynamics AX 2009

BENEFITS

- **Help your people work faster and smarter.** Streamline access to critical information and processes through Role Centers that help people organize and better manage individual work. A familiar, intuitive user experience helps people navigate, communicate, and complete tasks.
- **Manage growth and change.** Enhance collaboration throughout the organization and the entire supply chain. Build more profitable partnerships and respond swiftly to change by integrating processes and sharing information and documents.
- **Manage the complexities of a global organization and gain insight across multiple sites.** Centralize and standardize processes, collaborate effectively across your organization, and manage your business across geographies and locations.
- **Help comply with regulations and customer initiatives.** Help reduce the risk, liability, and cost associated with corporate governance, regulatory compliance, and customer initiatives, including financial, legal, and environmental initiatives.

Empower your people and enhance your organization's ability to compete in a global market by responding faster to change and managing complexity while complying with regulations and customer initiatives.

Microsoft Dynamics™ AX 2009 delivers improved tools to help your people find, use, and share information; build more profitable relationships; meet shifting demands; and capitalize on new opportunities. Your business can define flexible workflows that enhance organizational controls and help you meet a variety of compliance requirements, including financial, legal, and environmental, as well as customer initiatives.

Accessing information is easier than ever before with intuitive navigation that looks and works like familiar Microsoft programs.

Role Centers help people prioritize work and gain insight into relevant information.

Work smarter with Role Centers and powerful business intelligence

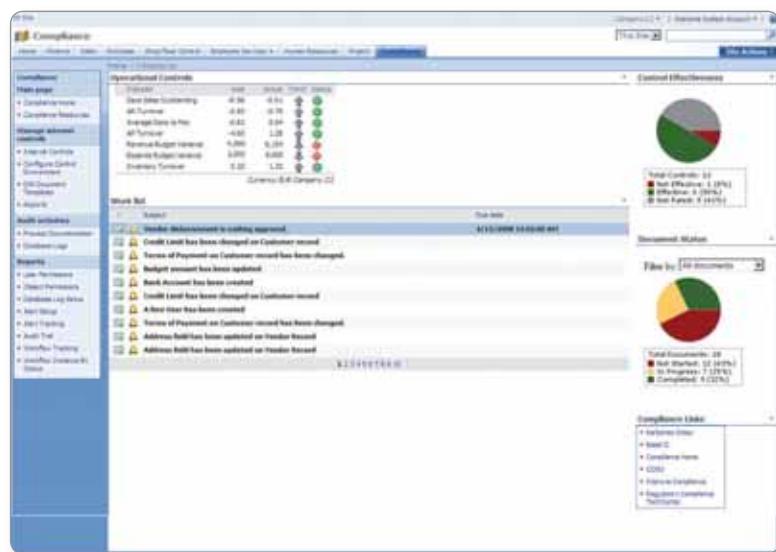

Microsoft Dynamics AX 2009 can help your people improve productivity by providing out-of-the-box, RoleTailored access to information, tasks, and business processes. Gain deeper insight into critical business data across your organization with relevant performance indicators based on predefined data cubes and flexible analytical tools, including integration with Microsoft® SQL Server® Reporting Services.

Maximize new business opportunities and accelerate growth

A flexible, service-oriented architecture (SOA), easy exchange of business documents, and Web services make it faster and easier to adapt Microsoft Dynamics AX to new business models and expanded partner relationships. A powerful workflow engine helps you respond quickly to customer demands and changing conditions by creating ad-hoc business processes.

Streamline business processes across locations and countries

Provide support for shared service centers for greater standardization across the organization and take advantage of economies of scale to reduce redundancy and operational costs. Integrated, Web-based expense management helps ensure people follow your company's best practices. In addition, new multi-site capabilities enable your growing organization to plan and allocate materials and resources smoothly across facilities. Internal sales representatives can provide accurate delivery dates using available-to-promise (ATP) and capable-to-promise (CTP) functionality.

The Compliance Center provides a central repository for managing compliance activities.

Define internal controls and improve transparency

Create workflows to specify events based on relevant compliance scenarios, including routings, approvals, delegations, and escalations. The built-in Compliance Center helps improve transparency into corporate governance and compliance with a single repository of policies, procedures, documents, and reports.

Upgrade to maximize your IT investment

With Microsoft Dynamics AX, Business Ready Enhancement Plan subscribers can get enhancements based on their specific plan. In addition, Microsoft Dynamics Sure Step, a suite of tools, methodologies, and services, simplifies and standardizes the upgrade process—whether you're upgrading from Microsoft Dynamics AX 3.0 or Microsoft Dynamics AX 4.0—to help you maximize your current IT investment. Contact your local Microsoft Dynamics partner for specific information about how you can benefit from the latest enhancements.

FEATURES

Role Centers	<ul style="list-style-type: none">• Microsoft Dynamics AX and the Enterprise Portal framework provide RoleTailored access to data, reports, alerts, and common tasks. You can personalize your Role Center to monitor and prioritize tasks based on business needs.• Tasks are presented visually as document Cues that provide information about the workload associated with each activity.• Role Centers can be displayed in a Windows® client or Enterprise Portal in Microsoft Dynamics AX using Microsoft Office SharePoint® Server.*
Upgrade options	<ul style="list-style-type: none">• Upgrade directly from Microsoft Dynamics AX 3.0 or Microsoft Dynamics AX 4.0 to Microsoft Dynamics AX 2009.
Unified communications	<ul style="list-style-type: none">• Use presence information to collaborate easily with coworkers, business partners, vendors, and customers whose data is maintained in your ERP system.• Communicate by sending e-mail or starting an instant message or phone conversation from within Microsoft Dynamics AX.**
